

Autotex Touch

Hardcoated Polyester Film

MacDermid Enthone
INDUSTRIAL SOLUTIONS

MacDermid Autotype introduces **Autotex Touch**, the new hardcoated polyester film for human-machine interface applications.

Autotex is the world's leading range of hardcoated polyester films designed for technically demanding applications such as membrane touch switch overlays, touchpads and fascias. Autotex Touch is a new generation finish maintaining all the superb Autotex performance characteristics proven over 30 years. Developed for the touchpad market, Autotex Touch builds on the strengths of Autotex, adding an outstanding easy-glide feel that is perfect for precise touch gesturing.

The Autotex range of printable polyester films feature a textured hardcoat made by MacDermid Autotype's proprietary, highly specialised process. The textures do not contain filler, which means they are consistent from roll to roll and batch to batch, year on year, and have optimised optical properties delivering the ideal blend of low haze and low gloss:

- Back-printed graphics have exceptional brightness and optimal colour reproduction, so your customers' designs and branding will always look great.
- The Touch finish can be printed with Windotex to produce integrated windows with incredible clarity.

All Autotex hardcoats are formulated using UV curing technology which imparts a unique blend of physical properties. Autotex products have excellent abrasion, scratch and chemical resistance combined with outstanding flexibility.

The ideal solution for integrated membrane touch switches and touchpads. **Autotex Touch – a touch of class!**

PROPERTIES

- Silky smooth, easy glide texture
- Anti-fingerprint surface
- Windotex compatible - create ultra clear windows
- As with all Autotex films:
 - Controlled, consistent optical properties
 - Class leading scratch and wear resistance
 - Outstanding colour reproduction
 - Perfect balance of flexibility and hardness
 - Anti-shatter
 - Exceptional chemical resistance
 - Thermal stability
 - Excellent embossability

FORMAT

Autotex Touch is converted in a Class 10,000 cleanroom and is available in sheets and rolls up to 1220mm wide.

APPLICATIONS

- Membrane Touch Switches
- Stand alone and integrated touchpads
- Fascia panels and overlays
- Overlamination
- Nameplates and labels
