

New Autohaze Extra

Rapid Acting Haze Remover

Powerful and highly effective screen haze remover.

Autohaze Extra quickly removes ghost images and stubborn screen stains. This blend of strong caustics and powerful solvents is supplied as a thickened liquid, making **Autohaze Extra** easier to brush or coat onto the screen than a conventional paste.

MacDermid Autotype manufactures a complete range of haze removers for all your screen cleaning needs.

Outstanding Results - Autohaze Extra

- 'Like new' screens in under 10 minutes
- Quickly removes most screen stains
- Easy application, thickened liquid reduces runs
- Blend of strong caustic and powerful solvents
- For really tough stains use with **Autosolve Industrial AF** 'activator'

Multipurpose cleaner - Autohaze Extra

Easily removes the following mesh stains:

- Textile inks including Plastisols, water based and discharge
- Graphic inks including UV, vinyl, paper and board
- Industrial inks including electronics, ceramics and metallic
- Fused stencil and Diazo stains

How to use - Autohaze Extra

- Always wear gloves and goggles when handling any haze remover
- Use the **Autotype Brush** or an old coating trough to apply **Autohaze Extra** to both sides of the dry mesh
- Leave for up to 10 minutes
- Rinse off with a low pressure water spray
- Blast the screen clean with a High Pressure Gun

For very stubborn stains **Autohaze Extra** can be activated with **Autosolve Industrial AF** Screen Wash solvent immediately before rinsing.

New Autohaze Extra

Rapid Acting Haze Remover

The Autotype Haze Remover Range

Screen printers don't all use the same inks or processes. To make sure that you get the cleanest screens possible, MacDermid Autotype manufactures a complete range of haze removers to cover all of your screen cleaning needs.

Usage	Haze Remover Type	STAIN TYPE			Working Time	Caustic Level	Solvent Level
		Ink Stains	Stencil Stains	Diazo Stains			
Every Screen	Autosolve	8	2	1	2 mins	None	High
Regular Use	Quick Clean	10	5	3	5 mins	Low	High
	Autokleen Plus Quick method	4	4	8	5 mins	Low	Low/Medium*
	Autokleen Plus 1 hour method	6	6	10	1 hour	Low	Low/Medium*
	Autokleen Plus 12 hour method	9	10	10	12 hours	Low	Low/Medium*
Occasional Use	Autohaze Extra	9	8	10	10 mins	High	Medium
	Autohaze	10	10	10	8 mins	Very High	Medium

*Medium if a solvent based activator is used

EVERY SCREEN

Autosolve - The **Autosolve** range of water washable solvents are specially formulated to provide you maximum cleaning power with a low evaporation rate for optimised ink removal. For best results use immediately after printing. **Autosolve Industrial AF** is perfect as an 'activator' for both **Autokleen Plus** and **Autohaze Extra**.

REGULAR USE

Quick Clean - The ideal solution for stubborn dried-in inks or cured UV inks that can be difficult to remove. This low caustic/solvent blend gives more cleaning power than **Autosolve** on its own and will also remove Diazo stains.

Autokleen Plus - Apply **Autokleen Plus** at the end of the day and leave overnight for best results, then brush on **Autosolve Industrial AF** to activate. The results are truly remarkable.

OCCASIONAL USE

NEW Autohaze Extra - When screens are needed quickly, **Autohaze Extra** will get the job done in less than 10 minutes. It is easy to apply and very economical in use.

Autohaze - There aren't many stains that can resist the cleaning power of this premium haze remover paste and the screens are ready to use in under 8 minutes.
