

REGULAR FILLER

Water Soluble Screen Filler

DESCRIPTION

Regular Filler is a water soluble, general purpose blockout. Ideal for use with all ink types except water based systems.

Applications

Regular Filler is ideal for all mesh counts from 70/cm (177/inch) upwards.

READ ENTIRE TECHNICAL DATA SHEET BEFORE USING THIS PRODUCT

FEATURES & BENEFITS

- A blockout and retouching filler for use with solvent based and UV curing inks. Medium viscosity gives excellent coating characteristics. Green colour.
- Easily applied with coating trough, card or brush. Suitable for a wide range of mesh counts, with minimal 'drip through'. Can be diluted for use as a retouching filler. Minimal colour leaching even on the longest runs.

WORKING INSTRUCTIONS

Apply the filler to the mesh and spread over the unwanted open areas with a straight edged piece of card or plastic. When used with indirect stencil systems, it is advisable to apply the filler before the backing sheet is removed, to allow rapid and accurate filling.

For more information on how to use MacDermid Autotype products, go to the How to Guide section at macdermid.com/autotype.

SHELF LIFE & STORAGE

Regular Filler should be stored between 3 to 20 °C (37 to 68 °F). Do not freeze.

Shelf life at these conditions is two years.

PACKAGING

Regular Filler is available in trade packs of 12 x 1 Litre and 2 x 5 Litre.

SAFETY & WARNING

MacDermid Autotype recommends that the company/operator read and review the Safety Data Sheets for the appropriate health and safety warnings before use.

Safety Data Sheets are available from MacDermid Autotype.

WASTE TREATMENT

Prior to using any recommendations or suggestions by MacDermid Autotype for waste treatment, the user is required to know the appropriate local/state/federal regulations for on-site or off-site treatment which may require permits. If there is any conflict regarding our recommendations, local/state/federal regulations take precedent.
